## Summary

---

I have a diverse educational background and possess exceptional skills in my field. Holding a bachelor's degree in Computer Science, I gained a solid foundation in multiple programming languages, software development methodologies, and problem-solving abilities. Throughout my academic journey, I actively participated in various projects, both as an individual and as part of a team, allowing me to gain practical expertise in creating software solutions.

## EXPERIENCES

---

- **CO-OP trainee at aramco.**  
I worked on extending fiber optic cables, checking servers in the data center, and also on using PLC
- **Worked on a tourism website (Travel)**  
(Front-end , Back-end , Database )  
Used technologies: Laravel PHP , Bootstrap, SQL , HTML , CSS

And to show my projects, [visit my GitHub](#)

I attended 4 courses,

- PHP Laravel
- [Ethical Hacking Essentials \(EHE\)](#)
- [Network Security](#)
- [Penetration Testing, Incident Response and Forensics](#)

and what I am able to do:-

- Able to create CRUD project with PHP & Laravel
- Comfortable with using MVC software design pattern
- Databases design and management

## EDUCATION

---
